

Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: January 11, 2008

Water Body Under Evaluation:

Water Body ID #: 3303
Name: Cole Camp Creek (Class C)
Length of Segment: 4.3 miles
County(ies): Benton

Use Attainability Analysis (UAA) Study:

UAA ID #: 0449
Submitter: BWR
Date(s) Conducted: May 16, 2007
Date Received: June 1, 2007
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☒ Yes ☐ No ☐ Unknown

Comments: The UAA survey was conducted in May 2007 and no WBCR was observed. One interview was conducted during the survey and no use was reported. Written comments received in 2005 reported existing swimming and fishing uses. Research into the 2005 comments revealed the uses were observed on this segment since Nov. 28, 1975.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: Sites 5 and 6 were on the unclassified portion of the creek, upstream of this WBID, so were not evaluated. The stream did not meet the depth criteria at any of the remaining 4 sites evaluated. Due to reported existing use (swimming), the committee recommends the WBCR use designation be assigned. Due to reported secondary contact (fishing), the committee recommends Secondary Contact Recreation be assigned.

Committee Recommendation:

- ☒ Add Use ☐ Retain Use ☐ Remove Use
☐ Modify Use ☐ Inconclusive

Committee Members: Jill LeRoy, Donna Menown, Anne Peery
